# TODAY OPERATIONS

# OUR DELIVERY DRONES JOURNEY

FROM «PLAYING AROUND» TO «REAL APPLICATION» IN 5 YEARS

**July 2015:**  
First Proof-of-Concept

**Q1/2017:**  
First commercial pilot (Lugano)

**Q3/2017:**  
Investment in  
Matternet

**Q4/2017:**  
Start regular  
operations in  
Lugano

**in 2018:**  
Testing of drone  
networks all over  
Switzerland

**in 2019:**  
Initiate Safety  
Board for Swiss  
Operations

**in 2020:**  
Restart regular  
operation in  
Switzerland

# WORLD PREMIERE IN LUGANO

FIRST COMMERCIAL APPLICATION IN URBAN ENVIRONMENT

- First commercial drone delivery service in an urban environment
- More than 3.400 successful flights have been operated
- Flight time 3-4 minutes (instead of 30-45 minutes)

# DRONES IN ZURICH

## JANUARY 2019

- Daily five to ten, on demand, transports between university hospital and university laboratory
- Operating hours between 07.45 to 16.45
- approx. 4-5 minutes for the 3 km long route
- faster, more flexibel and more sustainable
- One-year-trials to gather long-term experience

---

# TOMORROW

# OPERATOR ROLE EVOLUTION

	Nowadays	Mid-Term (> 2021)	Long-Term (> 202?)
<b>Prerequisites</b>	On-going	Logistic station in use Fully autonomous drone solution (no technicians on spot)	Drone service is established; High trust Customer willing to centralize GDP-approved transportation process Flexible routing
<b>Value Proposition</b>	Selective transports with time savings and flexibility, but no SLA (7h/day, Mo-Fr, 48 weeks/year) B2B (fixed location)	Autonomous transportation service with time saving, flexibility, SLA (24x7x365) B2B (fixed location)	Fully integrated transportation solutions, flexible routing, SLA (24x7x365) B2B / B2C (fixed and dynamic location)
<b>Back up logistics</b>	Alternative transport method is organized ad-hoc according to situation on each route	Alternative transport method is standardized. Transport are dispatched manually over a system	Interface to different logistic provider is realized. Transports are dispatched automatically via a system
<b>Key Activities</b>	BusDev, Lobbying	Service Provider	Full Service Provider, Integrator, Outsourcer
<b>Air space approval process</b>	Static, manual approval process (3-12 months per route)	Static, automatic approval process following a framework (1-60 days per route)	Dynamic approval process (1-10 minutes per route)

Urban Area

Biological Substances

## LUGANO Facts

Operations started: Oct 1, 2017

Hours of operation 0830-1700

5-15 deliveries per day

Over 2,300 successful deliveries ( 4.758 flight legs )

World's First Hospital Network

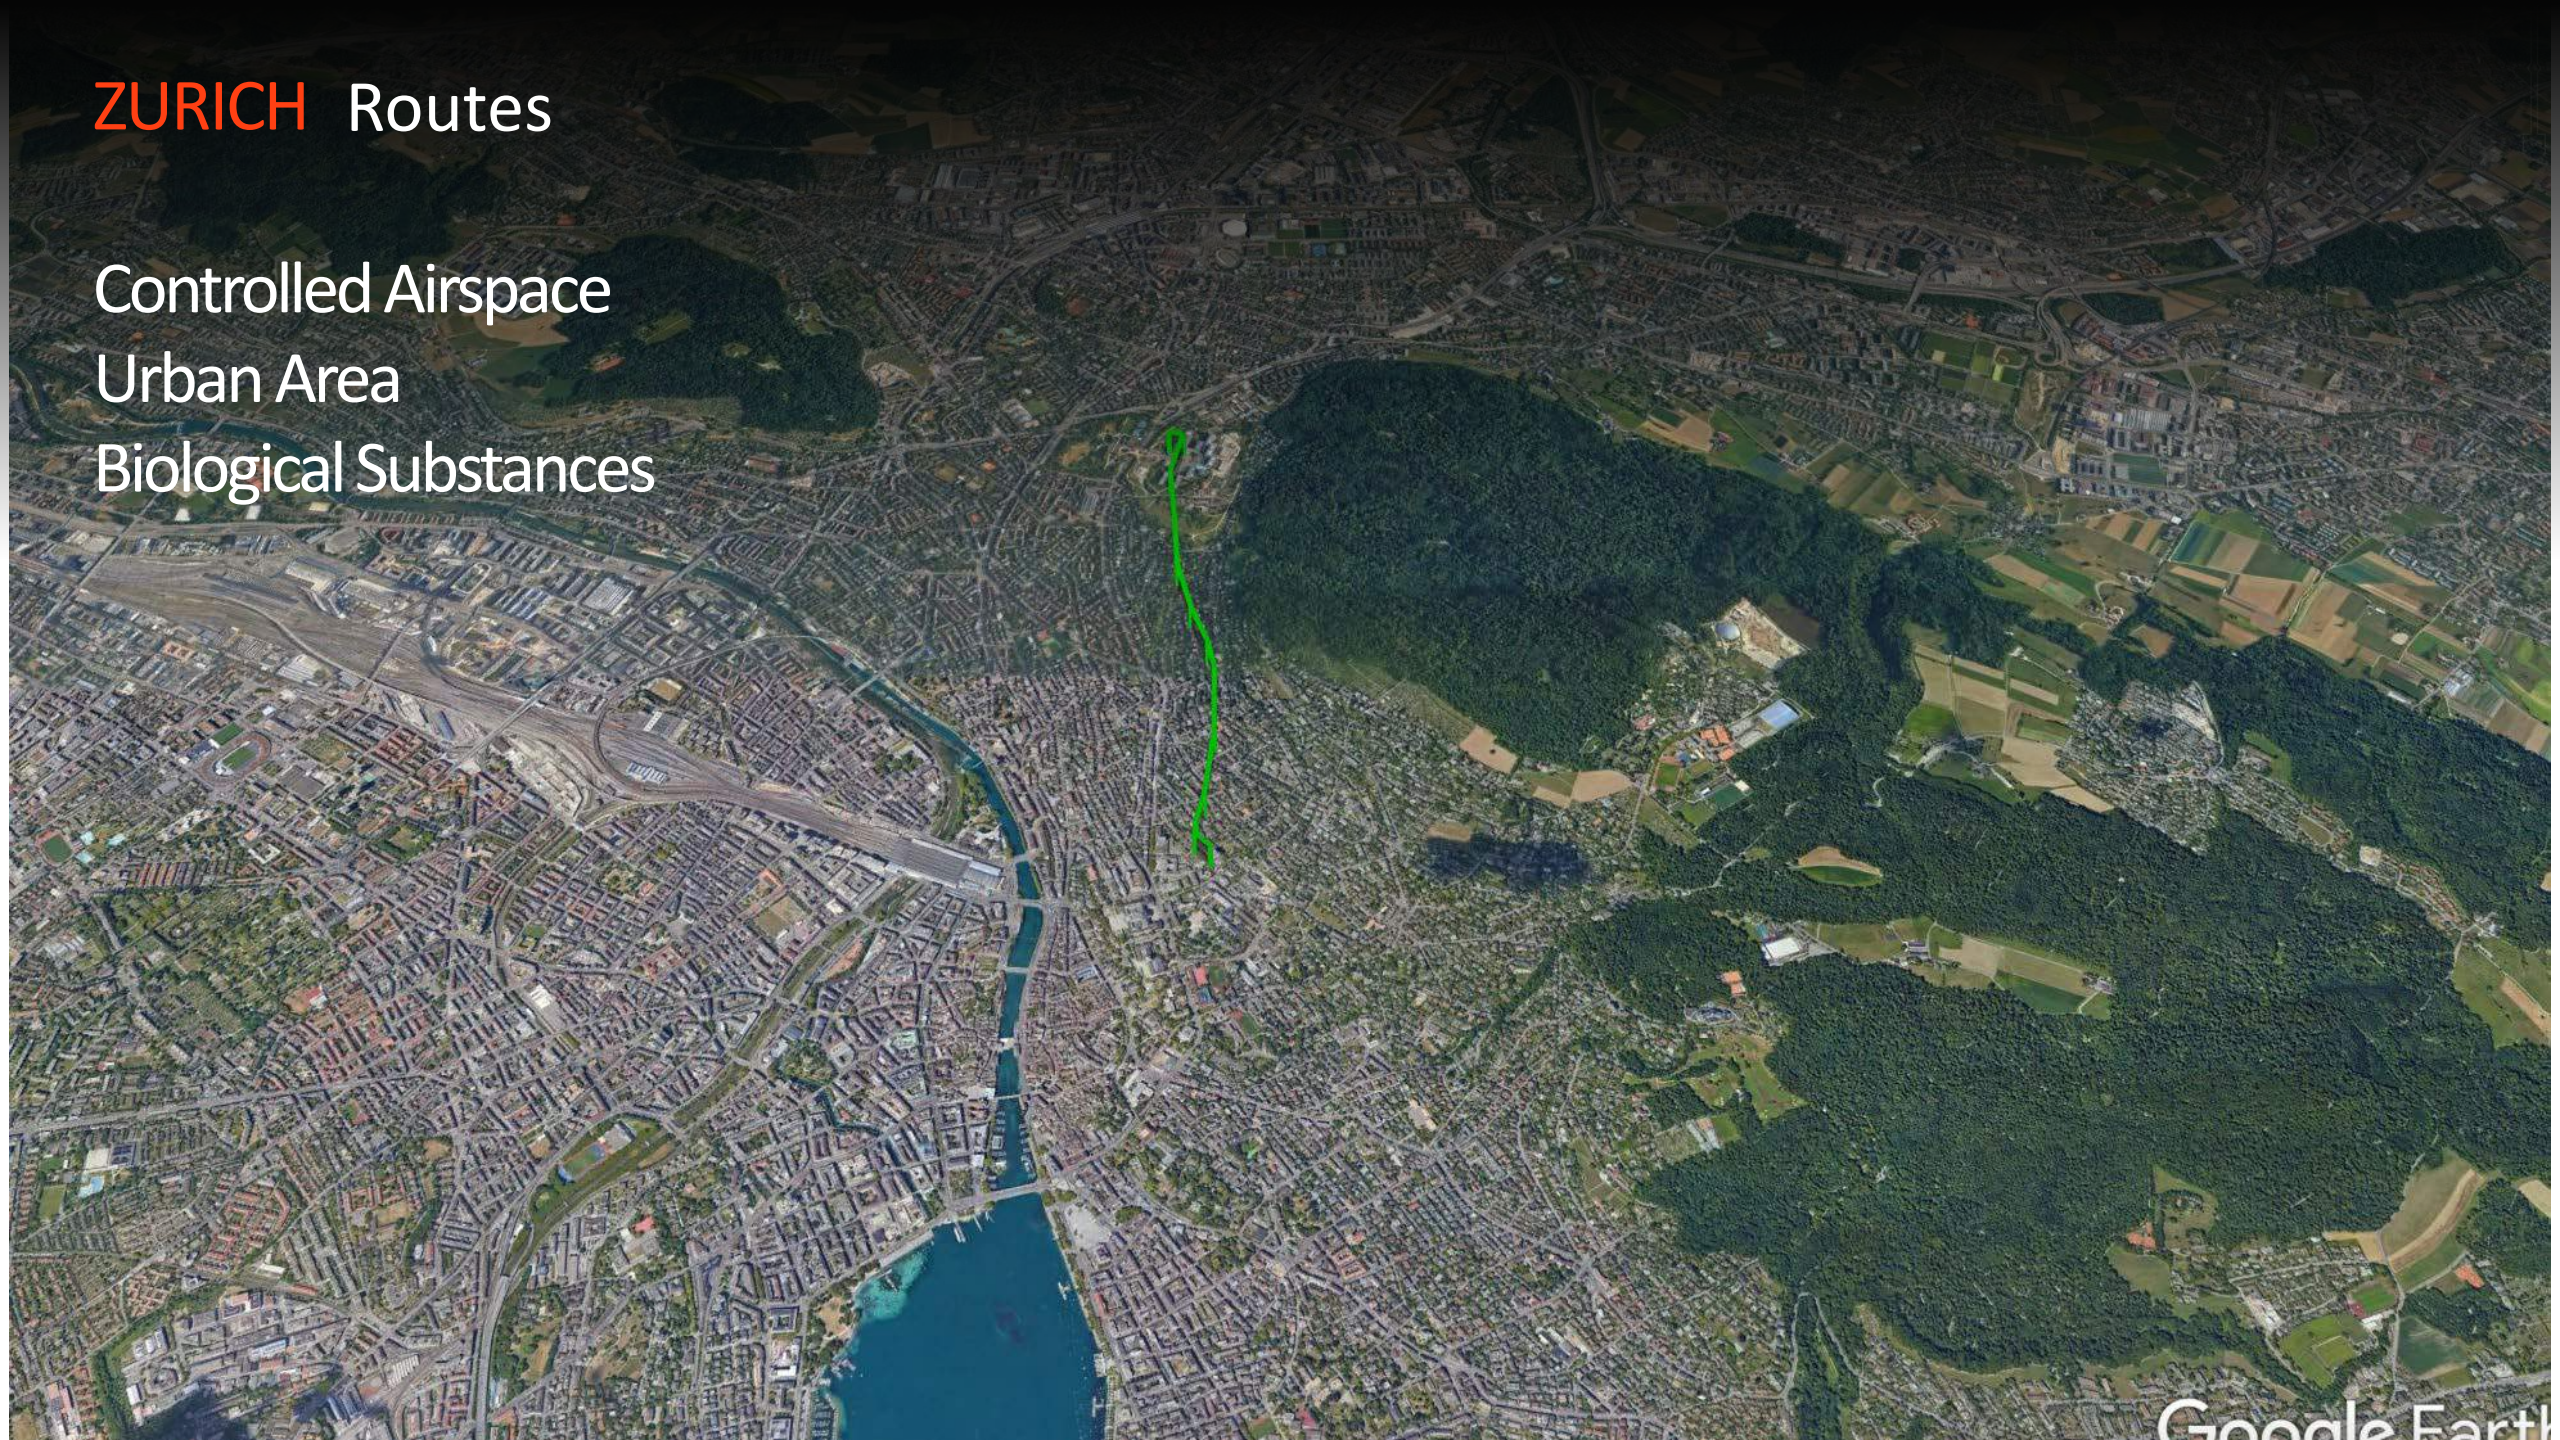

# ZURICH Routes

Controlled Airspace

Urban Area

Biological Substances

## ZURICH Facts

Operations started: Dec 11, 2018

Hours of operation 08:30-15:30

5-15 deliveries per day

Over 500 successful deliveries ( 1,146 flight legs )

# ROUTE PLANNING

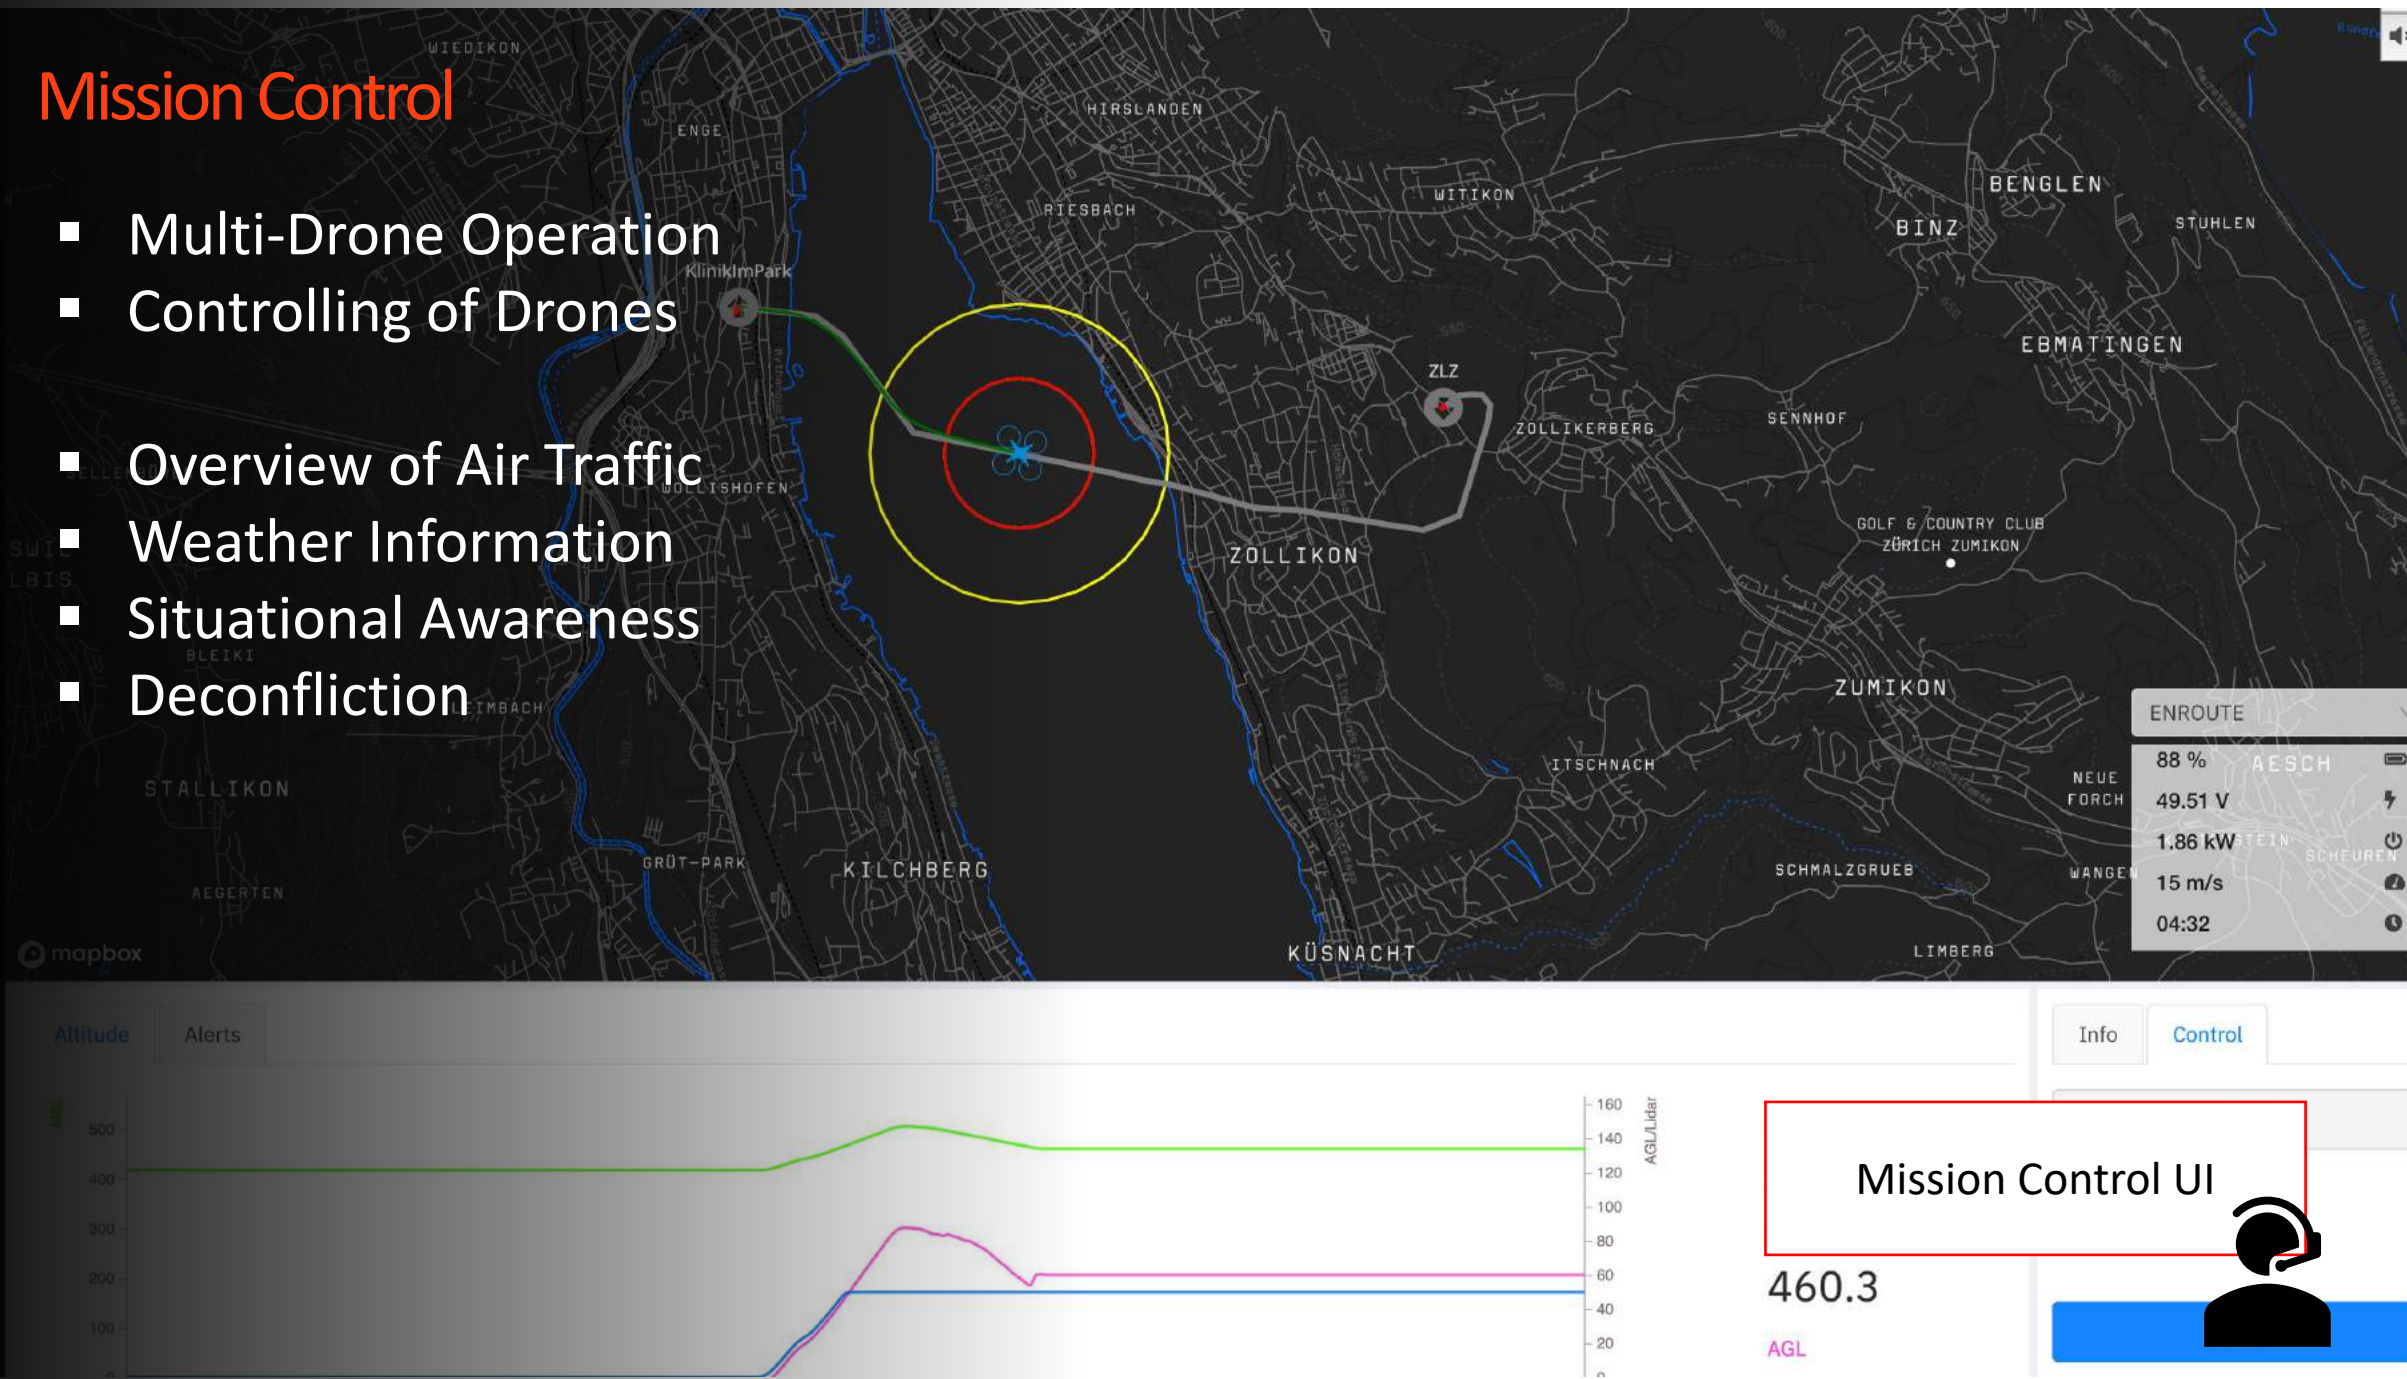

- SORA approach
- Approved Routes
- Geofencing

# Mission Control

- Multi-Drone Operation
- Controlling of Drones
- Overview of Air Traffic
- Weather Information
- Situational Awareness
- Deconfliction

## INTEGRATION INTO AIRSPACE Now

- Mission Control
- Flights in CTR
- Direct Contact to Hospital
- Flarm/ADSB Broadcast of HEMS
- FLARM Broadcast Drone
- Contact to ATC
- NOTAMs
- Operators on ground/ Visual Deconfliction

## INTEGRATION INTO AIRSPACE Next Steps

- Better Integration of Manned Aircraft Into VLL-Airspace
  - Actively sharing flight data
  - Sharing of flight plan
- Interface with ATC
- Dynamic Geofencing
- Improving Infrastructure
  - Low Level Airspace Surveillance
  - Cellular Connectivity Improvements

## Why Switzerland?

Virtual Swiss Drone Industry Tour

**AIRMAP**

# AirMap: Airspace Intelligence to Power the Drone Economy

Dr.-Ing. Andreas Lamprecht, CTO AirMap

Dec 14th 2020

Growing UAS activity is overwhelming traditional workflows across enterprise, civil government, and defense sectors.

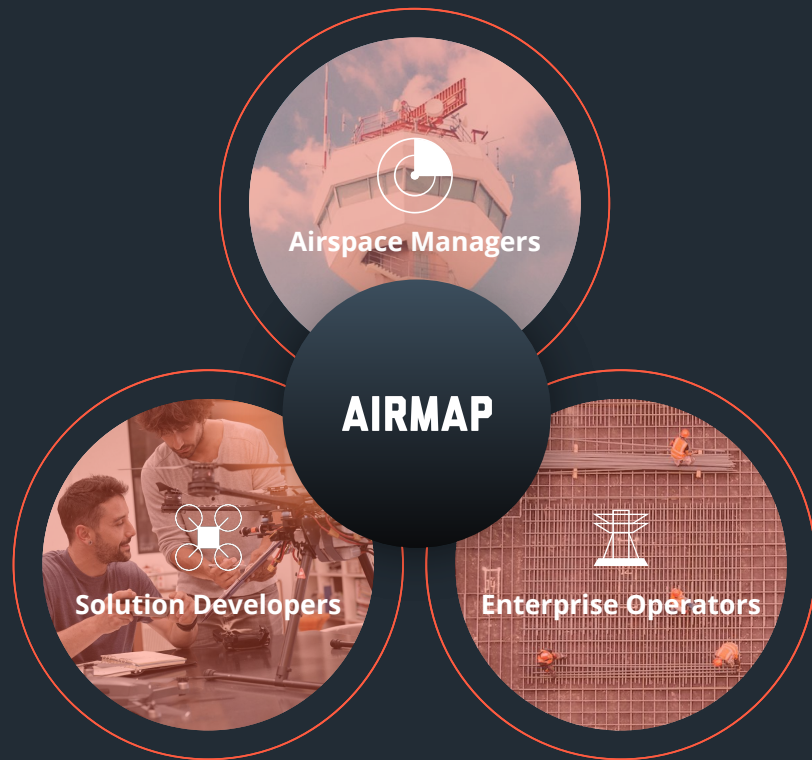

Without the right infrastructure, low-altitude airspace safety will be compromised - and enterprises and governments won't be able to reap the benefits drones provide.

**UAS Traffic Management (UTM) can help.**

AirMap automates airspace and dataflows services enabling **Airspace Managers, Enterprise Operators, and Solution Developers** to scale drones operation safely and efficiently.

Industry leadership

## Case Study

# Faster Authorization for UAS & Other Special Flights

### SWISS U-SPACE ROLLOUT →

In Switzerland, flights by UAS and other non-commercial aircraft in CTRs are subject to approval from the airspace authority.

With the AirMap UTM Center, airspace authorities can administer one-click, multi-step, and fully automated authorizations for special flights in controlled airspace.

The new authorization service will go live in 2021 as part of skyguide's greater Swiss U-space initiative.

*"UAS and other special flight operators no longer have to wait 10 days to fly in controlled airspace."*

*Robert Fraefel, Head of Swiss U-space*

AirMap to provide RID solution with partner skyguide

## Activities in Switzerland

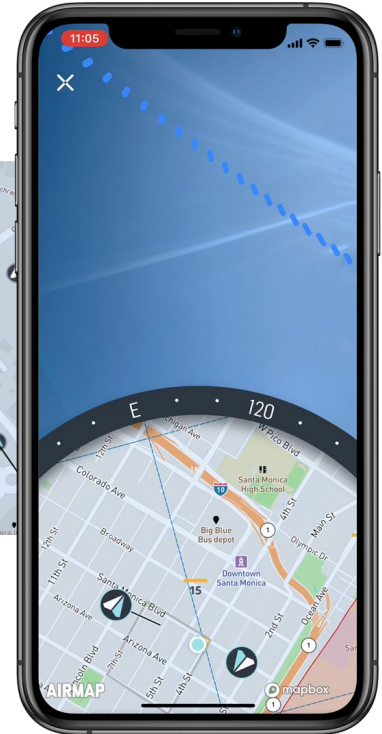

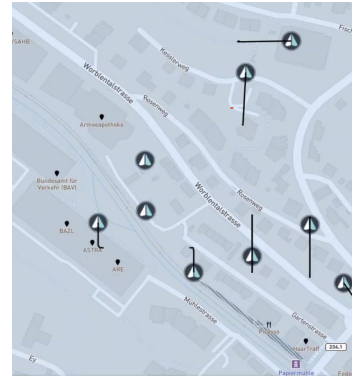

Switzerland U-space Implementation program as a Remote-ID working group with 10 service providers.

The aim is to implement a fully standard-compliant network Remote-ID system on a purely voluntary basis.

Produced Artifacts include:

- Master Agreement governing data-sharing and SLA between Service Providers
- Test Plan and Approval Conditions
- Performance Criteria and Recommendations on Policy
- Lots of system-maturity
